

# Dry Cylinder / Wet Cylinder

## Dry Cylinder

### Product Overview

- Centrifugally Cast Cylinder Liner & Sleeves with precise machining.
- Manufactured with is FG220/ASTM material specification with Chromium & Nickel elements
- Micro structure & chemical composition analysis of each and every batch.
- Fine Plateau Honed cylinder liner bore.

- Randomly inspection of honing angle and structure of cylinder liners.
- Randomly check tensile strength and profiles.
- 100% dimensional inspection of finished Cylinder Liners.
- 30000 pieces production capacity of Cylinder Liners per month.
- We produce more than 1200 various models of Cylinder Liners for different

## Specifications

Operation	Diameter (mm)	Accuracy
Inner Dia	40.00 to 250.00	± 0.020 mm
Outer Dia	44.00 to 350.00	± 0.020 mm
Total Length	70.00 to 500.00	± 0.100 mm

## Wet Cylinder Liners

### Product Overview

We are genuine manufacturers, exporters and suppliers of wet or engine cylinder liners based in India. Our state of art infrastructure and dexterous team are biggest strength responsible for our success. They not only help us in achieving our goals but also have set new standard in manufacturing industry.

Our engine cylinder liners have wide application in various industries and equipment like Engine, Tractors, Generators, Compressor, Cars, and Trucks etc.

## Applications Areas – Wet or Engine Cylinder Liners

Our products are widely accepted by industries due to their curate dimensions, sturdy design, and corrosion resistance properties. Best part is that each and every product is manufactured under close supervision of engineers and quality experts ensuring high end product to customers. We always follow current market trends to fulfill demands of our customers.

## Salient Features – Wet or Engine Cylinder Liners

- Low wear and tear resistance
- Highly durable and competitively priced
- Optimum heat dissipation
- Sturdy designs
- Easy to operate
- Low maintenance costs

## Auto Liner Exporters

Our products are widely accepted by industries due to their curate dimensions, sturdy design, and corrosion resistance properties. Best part is that each and every product is manufactured under close supervision of engineers and quality experts ensuring high end product to customers. We always follow current market trends to fulfill demands of our customers.
